

## TravelChain Litepaper

Short Introduction - May 2025

TravelChain is a blockchain network specifically designed for the travel industry. With an EVM-compatible infrastructure, it ensures fast, cost-effective, and secure payments. The total supply of 29 million tokens (TT) will be used primarily for travel-related transactions. Our goal is to establish a global platform that simplifies travel payments.

### Key Highlights:

- EVM-compatible blockchain
- Total Supply: 29,000,000 TT
- Use: Flights, Hotels, Rewards
- Vision: Decentralized global travel payment system
