

TravelChain Whitepaper

Version: 1.0

Date: May 2025

1. Introduction

TravelChain is an EVM-compatible next-generation blockchain platform aiming to revolutionize travel payments. Our platform provides a transparent, secure, and decentralized payment infrastructure that benefits both travelers and travel industry stakeholders.

2. Mission & Vision

Our mission is to make travel payments faster, cheaper, and more reliable.

Our vision is to make TravelChain the global standard for travel transactions.

3. Technology

- Blockchain: EVM-based, optimized for scalability and low transaction fees.
- Smart Contracts: Used for automated and trustless payment systems.
- Wallets: User and business-friendly wallets for seamless on-chain operations.

4. Tokenomics

- Token Name: TravelToken (TT)
- Total Supply: 29,000,000 TT
- Distribution:
 - * 40% Community & Rewards
 - * 25% Team & Advisors (locked)
 - * 20% Strategic Partnerships
 - * 10% Marketing & Ecosystem
 - * 5% Liquidity

5. Use Cases

- Travel payments (flights, hotels, etc.)
- Loyalty programs
- Data sharing rewards
- NFT booking system (future)

6. Roadmap

Q2 2025 - Testnet launch

Q3 2025 - Mainnet launch

Q4 2025 - CEX listings, NFT booking module

Q1 2026 - DAO transition & full decentralization

7. Security

Audited smart contracts and regular security assessments ensure maximum chain safety.

8. Community & Participation

We are community-driven. Users can help shape the future of the network through suggestions and feedback.
